Art Unit: 2814

The election filed March 5, 2003 has been entered and made of record as paper no. 9.

Applicant's election without traverse of species IV of figure 7 in Paper No. 9 is acknowledged.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 4, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jaso et al.

Jaso discloses a semiconductor device comprising a substrate (12), a first semiconductor layer (16) formed above a buried oxide layer (14) and a second semiconductor layer (122). Since the second semiconductor layer and the buried oxide layer are both formed on the substrate, it would have been obvious that the interface between the substrate and second semiconductor layer is placed in substantially the same depth position as the undersurface of the buried oxide layer.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jaso et al as applied to claims 1, 3, 4, and 6 above, and further in view of Kita.

Art Unit: 2814

Kita discloses a trench type DRAM crossing the buried oxide layer (102). It would have been obvious to one of ordinary skill in the art to combine the teachings of Jaso and Kita to form the claimed device.

The other references are cited to show other structures pertinent to Applicants' disclosure.
